Hi Dan!

Yes, I plan to go and found out from my Brownfields attorney associate that there are just 28 registered attendees so far so it should be a good one. He is on the faculty with EPA, Ecology and a National Brownfield Association type for this workshop.

As you saw on the agenda and email, I am supposed to bring along information and questions on Brownfields sites we have. Do you have any on the McConkey/Sesko/Gasplant site I should have in my arsenal? Otherwise I have several general thoughts on several I have had and still working on now – Gig Harbor, Port Orchard, etc.

Hope you are well and enjoyed a weekend of real sun. My daughter graduated Saturday and the ceremony was outdoors... great weather in the end.

Take care.

Subject: Technical Assistance Reminder

Good afternoon everyone!

This is just a reminder that you have confirmed your attendance at the Brownfield Technical Assistance Training for Thursday, June 19th in Lacey. Because, the course is meant to be hands on and we want you to get the most value from the material, it is suggested that you consider the following questions for brownfield sites in your community and bring questions you might have on the day of the course. There will be public and private experts available and this will be an

excellent opportunity to gain information.

- What is the highest and best use of your brownfield sites?
- How do you determine and value on your brownfield sites?
- What unique methods have you used to market your brownfield sites?
- How do you utilize the state brownfield programs?
- Have you used environmental insurance?
- When do you use RFP's vs.. RFQ's?.

I have attached an agenda for the course. This agenda contains time and location information! Please let me know if I can be of further assistance. We look forward to seeing you Thursday!!

Sincerely,
Mandy Bruggeman
